Memories. Tales told 'round the fire. Of people. Places. Things done. A summer's camping. Boating. Fishing the lakes. Those hunting trips. Backcountry horse rides. Four-wheeling the dunes. Winter's sports. Visiting friends in the country. Whatever your outdoor passions, a Lance camper can make memories that last lifetimes.

Lance 2009

Established in 1965, Lance is North America's largest truck camper manufacturer - with a staff of over 400 working within 141,000 square feet of custom-designed, state-of-the-art manufacturing and customer service facilities on a 22-acre campus in Southern California.

If you're looking for an RV – and trying to decide amongst towables, campers or motorized – here are some very practical reasons to own a truck camper: **Purchase price far less than a motorhome. Lower overall cost of ownership** (versus motorhome's registration, fuel, storage, tires, engine and transmission maintenance, insurance and depreciation). **No storage costs** when stored at home. **Tow all your toys** – boats, horses, cargo, motorcycles, snowmobiles, ATVs, etc. **Ease in getting around. Highly maneuverable. Go anywhere your truck goes. Not limited to RV sites. Better fuel economy. Less warranty and service issues. Easier to find techs and parts to work on a pickup truck than a motorhome chassis. Comfort behind the wheel. No need to get used to a new vehicle. No trouble backing-up. The most versatile RV. Like owning four different vehicles in one: a comfortable motorhome – a powerful tow vehicle – an all-season, all-terrain RV – a second car around town.**

With 44 years' experience specializing in truck camper design, engineering and construction – and earning the RV industry's reputation for best in owner satisfaction and camper quality – Lance has more than 100 Factory Authorized Dealerships across the USA and Canada ready to serve you. And you can visit us online at LanceCamper.com.

Lance

matching your truck + camper

Truck manufacturers provide consumers with certain ratings to help determine the capacities of the truck, as manufactured. Some of those ratings are posted on the door jam, a label in the glove box, or in the owner's manual.

If you already own a truck that you intend to use for a camper, it's always wise to take it to a commercial truck scale to determine the actual weight of the truck. That information – along with your truck capacity information – will help determine the remaining capacities for carrying and/or towing.

Camper weights – both dry and wet – vary depending on what optional equipment you've installed and how full your holding tanks are. Also take into consideration the weight of gear, passengers and trailer tongue weight (if towing).

Truck and camper package handling can be greatly improved by adding support equipment like air springs ("air bags"), and special truck and cabover shocks – as outlined on page 34. Maintaining maximum tire pressure on quality tires with ratings equal to, or better than, your original tires is also important.

Because we're unfamiliar with your specific truck and how you intend to use it, Lance makes no warranties or representation – express or implied – as to the performance or reliability of your truck with a Lance camper.

For professional guidance, see your nearest Factory Authorized Lance Dealer. They're trained in properly calculating truck/camper packages.

truck + camper compatibility guide

The following are general guidelines to use when matching a Lance camper to your truck, and assumes standard equipment on both the truck and camper. Whether any camper can be used with your truck is dependent on your truck configuration (2WD vs. 4WD, standard cab vs. extended cab, etc.) – how much optional equipment is added to the camper – what you tow – and the weight of passengers and all other items you carry in your truck and camper. **Always consult with your Factory Authorized Lance Dealer.**

FOOTNOTES FOR SPECS

Cabover interior headroom height measured from cabover floor (without mattress) to highest point in cabover ceiling. **Truck bed height** measured from camper's truck bed plate to roof (without air conditioning unit, satellite TV antenna or roof storage system) – including the seven inches for the top of roof ladder. **Overall exterior height** measured from camper's retracted legs to roof (without air conditioning unit, satellite TV antenna or roof storage system) – including the seven inches for the top of roof ladder. **Center of gravity** is the balance point of a base-weight camper (with fluids) loaded onto a truck – and is measured from the point of contact (the truck's tail lights) forward towards the truck's cab. **Dry weight** based upon standard base model features – not including options or dealer-installed items.

Lance 1191

If you need the extra room for sleeping up to seven, the 11'6" Lance 1191 is a great family camper. With a dry bath, roadside slideout, side entry and rear fold-down tent (or rear trunk compartment), the 1191 is Lance's most spacious camper ever – with plenty of room in the cabover, dinette, rear tent and optional bunk beds. Everything you need for those fun-filled weekends with the family – with the capability of towing all your outdoor toys. And the side door allows easy in-and-out to and from your campsite.

DOMESTIC F-350/3500+ SERIES DUALY LONG BED

Top-of-the-line. The 1181 is an 11'6" truck camper with a fabulously large dry bath, lots of drawers and counter space, a huge insulated skylight and mirrored wardrobe in the cabover bedroom – and a double-door refrigerator, dinette and wardrobe on a full-wall slideout. There's also an optional roll-out pantry in the galley. With the most floor space of all our models, it's our only unit with a full-width

basement storage for long items like skis, snowboards and fishing poles. Any item up to 91 inches.

PRCA Calf Roping Champion Bill Huber, wife Jackie, sons Justin and Cody (and several horses in-tow) have been living the Lance life for years – traveling over 250,000 miles to rodeos in their Lance.

"If that's not a testimonial as to Lance's quality and durability, well then, I don't know what is," says Bill. "And it's very comfortable and convenient to travel in, too," adds Jackie. "We love our Lance!"

DOMESTIC HEAVY-DUTY F-250/2500+ SERIES SINGLE-REAR-WHEEL LONG BED

Perfect for people that prefer a non-slideout camper with larger floorspace, the Lance 1055 is a 10'11" camper with an oversized dry bath. Also, a food bar and abundant counter space not found in today's campers – until now. The 1055's basement design offers increased storage and tank capacities – and features many upgrades for 2009. It's an ideal match for F-250/2500 Series (and larger) trucks.

DOUBLE Lance 992 SLIDEOUT

DOMESTIC HEAVY-DUTY F-250/2500+ SERIES SINGLE-REAR-WHEEL LONG BED

One's good. Two's great! The 992 – Lance's double-slideout – for heavier duty, single-rear-wheel or dually trucks. The dry weight: 3310 pounds. And the 992's holding tank numbers are impressive, too. 45 gallons fresh. 40 grey. 30 black. With a forward center of gravity for better on-road balance

and handling, the galley – on its roadside slideout – provides an exceptional amount of counter space and storage. Plus, the area of the 992's wet bath is bigger than our largest dry bath models.

BASEMENT MODEL

Cool River interior

Lance 981

The Lance 981 is a 9'11" basement-style camper with a large wet bath – and, next to the 992, is our most spacious nine-footer ever. It sports a roadside full-wall slideout with

dinette and refrigerator. Large holding tanks and lots of sub-floor basement storage are key amenities. You'll enjoy ducted heat in the bathroom during your morning showers – and the mirrored wardrobe and huge insulated skylight (with ventilation screen and black-out shade) in the high-head-clearance cabover.

SportsCamper interior

Lance 835

The 835 is an 8'6" wet bath long bed camper that allows for greater towing capacity because you can tow right off your truck's existing factory hitch. And with no overhang, you can pull those heavy loads like boats,

horses, snowmobiles, personal watercraft, cargo trailers, ATVs, motorcycles, etc. – without a hitch box extension. The 835 can comfortably sleep five with a dinette that converts into a bed and an optional overhead bunk. Also available with SportsCamper options.

DOMESTIC HEAVY-DUTY F-250/2500+ SERIES SINGLE-REAR-WHEEL LONG BED

The Lance 815 for 2009 is a lightweight, narrow-body, 8'6" wet bath camper for single-rear-wheel long bed trucks, or short beds with the dealer-installed modification skirt option. Fully self-contained, the 815 comes complete with a queen-size bed, galley, dinette, shower, toilet, water heater, forced-air furnace – and lots of room. Perfect for lighter duty trucks, it's low, light and sleek. The 815 is available with SportsCamper™ options, too.

Lance 861

"We can't wait for the weekends when John and I get to take our horses out for some great backcountry riding," says Peggy. And their Lance really helps them enjoy their rides. "We just go off anywhere the backroads take us, set-up camp and have a terrific time. For us, **Lance is Total Freedom**," adds John.

Floorplan shown with
optional shower and toilet
in bathroom space

DOMESTIC HEAVY-DUTY F-250/2500+ SERIES SHORT BED

1. Optional shower and toilet in bathroom space.
2. Exterior compartment is large enough to house an owner-supplied portable gasoline-powered generator.
3. Rear exterior lamps provide exceptional outdoor lighting.

The all-new Lance 825 is exactly what we've been asked by many to build: a high-quality, no-frills truck camper with everything needed to enjoy the outdoors at a modest price. Light enough to fit a short bed Toyota Tundra or Nissan Titan. It's available either without a bathroom, or with† – and a short list of options make it easy to customize your rig to precisely how you desire.

† The bathroom space in the Lance 825 comes standard without a shower and toilet – and basically serves as a large closet or storage area. If you want a shower and toilet, you have two choices available as options:

SHOWER WITH CASSETTE TOILET AND WATER HEATER OPTION (Lance option 571) – which includes:

- Six-gallon DSI (direct spark ignition) water heater
- Enclosed, heated (ducted from furnace) and insulated 14-gallon grey water holding tank
- 4.5-gallon-capacity black water tank internally within cassette toilet
- Systems monitor panel with holding tank and battery indicators

SHOWER WITH MARINE TOILET AND WATER HEATER OPTION (Lance option 577) – which includes:

- Six-gallon DSI (direct spark ignition) water heater
- Enclosed, heated (ducted from furnace) and insulated 14-gallon grey and 14-gallon black water holding tanks
- Systems monitor panel with holding tank and battery indicators

A water heater isn't standard – nor is available as a stand-alone option.

Lance 981

After Tom's career in transportation for Sears, and Betty's as owner of a local Baskin-Robbins ice cream store, they now have the time to relax and enjoy life – sightseeing and shopping around the U.S. and Canada in their Lance.

"We love the maneuverability. We had a travel trailer. But a Lance really fits our lifestyle so much better now," says Tom. "One of the best things is we can park it in a regular car space!" laughs Betty.

Lance 861

The Lance 861 is a spacious 8'8" camper designed for heavy-duty short bed trucks – and provides the most floor space on a short bed truck. It features our popular wet bath and curbside slideout dinette. The 861's basement design allows

for oversized holding tanks and an optional built-in generator to sustain those nice, long camping weekends. The cabover bed area features a generous wardrobe/closet – with excellent headroom as well.

BASEMENT MODEL

Interior floor length 8'8"
Interior height 6'8"
Cabover interior headroom 44.5"*
Truck bed height 101.75"*
Exterior width 96"
Overall exterior height 112.75"*
Fresh water tank 30 gallons
Grey water tank 30 gallons
Black water tank 33 gallons
Propane 2 five-gallon tanks
Refrigerator 6 cubic feet –
three-way power mode
Furnace 20,000 BTUs
Generator Optional
Shower/toilet type Wet bath
Queen cabover + dinette beds
Standard
Fold-down bunk bed Optional

EXTENDED CABOVER ONLY

Exterior length 16'9"
Center of gravity 43"*
Dry weight 3070 pounds*

Structure interior

Lance 805

The Lance 805 is a narrow-body, 8'0" non-self-contained camper designed for domestic F-150s and 1500s – and import trucks with a minimum width of

48 inches between wheel wells. The 805 is our most compact and lightest camper, with a clean and simple floorplan. And with a light weight and light price, this rig is perfect for those quick, getaway week-ends. Designed primarily for short bed trucks, the 805 will fit long beds with modifications through your Lance dealer.

NON-BASEMENT MODEL

Interior floor length 8'0"
Interior height 6'6"
Cabover interior headroom 33"*
Truck bed height 82.25"*
Exterior width 86"
Overall exterior height 89.25"*
Fresh water tank 16 gallons

BETTER-BUILT TRUCK CAMPERS SIMPLY BECAUSE THEY HAVE TO BE

For 44 years, Lance has been producing some of the highest quality RVs available. If we don't build the best campers for our customers, we're out of business. It's just that simple.

LanceLock™

LANCE-PROPRIETARY STRUCTURAL ASSEMBLY PROCESS FOR SLIDEOUT + BASEMENT MODELS

Camper sidewall

LANCE CERTIFIES 100% COMPLIANCE WITH ALL U.S. FEDERAL AND STATE ELECTRICAL, PLUMBING, HEATING AND FIRE SAFETY STANDARDS AS ESTABLISHED FOR RECREATIONAL VEHICLES AS A MEMBER IN GOOD STANDING WITH RVIA (RECREATION VEHICLE INDUSTRY ASSOCIATION).

LanceLock cutaway cross-section with interlocking extrusions colorized in red.....

LanceLock is our proprietary structural assembly process used in our slideout and basement models to solidly integrate our rugged, aircraft-grade, .062-inch-wall-thickness aluminum frameworks. It's called "LanceLock" because of the special interlocking aluminum extrusions – that deliver outstanding strength and durability.

ENGINEERING FACT

The LanceLock extrusions ensure a precise fit of all structural components. It requires far less fasteners and **ELIMINATES THE NEED FOR WOOD STICKS** that most other truck camper manufacturers have to put inside their thinner aluminum tubing to have something "solid" to sink screws into for framing.

Fully laminated walls, floor, ceiling and cabover bed floor for years of dependability

Lock valuables behind a secure entry door with the long-item storage tray in basement models

Durable, mar-resistant interior paneling

Molded one-piece countertops in basement models

full-walk-on EnergyStar TPO roof

An incredibly tough, seamless, marine-grade thermoplastic polyolefin one-piece roof

200-pound capacity youth bunks with child-restraint netting

Automatic, dual-speed, 15,000/22,000-BTU furnace option in basement models

Ducted heat

Generous showers (6-foot, 250-pound man shown)

precision-fitted **SOLID** block foam insulation throughout

Cold outside?...It's warm everywhere inside the camper's living area with **ducted heat**. Additionally, we duct heat to the bath, holding tanks and cabover bed area in most models

Lance aluminum tubing is **Alodine®-coated** - a chemical treatment process that greatly enhances adhesion for lamination bonding, and provides superior corrosion protection to the metal.

.062" Alodine-coated aluminum tubing

The ultimate in stability and safety - interconnecting steel corner mounting plates both outside and inside solidly anchor front jacks to the camper structure

Lance's double-seal process tightly seals joints for added weather-proof protection

Frames are welded within a **precision jig system** to ensure true-to-square, tight-tolerance assemblies.

Superior corrosion protection with premium stainless steel and coated Everlube® fasteners

Electrical wiring is protected with tubing grommets inside the aluminum framing

custom interlocking aluminum extrusions

No water intrusion with sealed tail lights

Rear jacks attached to bumper

Tinted windows reduce glare and reject the sun's harmful rays

Heavy-duty Phat™ ladder with stronger and larger diameter tubing

Powder-coated, non-rust aluminum bumper

Prewiring for most electrical options allows easier installations of additional equipment later

Non-rust, stainless steel tie-down brackets with no paint to chip off

Much easier entry into a camper with Lance's "well step" step-up-entry design

[illegible]

A white motorhome is driving on a two-lane road that curves to the right. The road is bordered by a metal guardrail. To the right of the road, a white rectangular sign with black text reads: "SHARP CURVES-STEEP GRADES", "TRUCKS-AUTOS WITH TRAILERS", "NOT ADVISABLE", and "TURN OUT 1/4 MILE". The background is filled with dense evergreen trees under a clear blue sky.

Outdoorsman
Tony
Chachere

“I’m a third-generation outdoorsman and the grandson of legendary Louisiana Hall of Fame chef Tony Chachere. I enjoy our great outdoors many ways: hunting, fishing, cooking and camping. A true outdoorsperson knows that outdoor excursions can take many a twist and turn. I truly believe that Lance truck campers are the most versatile RVs on the market today...period! And here’s a picture of my wrapped Lance rig!”

Tony's Lance is wrapped with graphics promoting Catch-A-Dream Foundation - which fulfills the outdoor wishes of children aged 18 and younger who suffer from life-threatening illnesses. The uniqueness of Catch-A-Dream is that it not only allows a child to experience an outdoor adventure, but the entire family is there to share in the experience with the child, accompanied by a mentor from Catch-A-Dream.

camper power

Your camper's two electrical distribution systems - 12-volt DC and 110-volt AC - are connected to a combination power panel/converter/charger. Fuses and breakers for both systems are located inside this panel.

The 110 volts AC that comes from shore power through the camper power cable (or from an optional built-in generator) provides 110 volts to the refrigerator, air conditioner and the 110-volt outlets in the camper.

The converter provides 12 volts DC to all the low-voltage fixtures and appliances throughout the camper. The charger portion of the power panel will distribute 12 volts to recharge the camper battery when 110 volts is available.

There are two other ways to acquire 12-volt power. Your dealer will install a camper plug in your truck bed that will attach your camper's electrical

Optional 80-watt-output solar panel

system to the truck alternator. While the engine in your truck is running, it will send power to your camper battery if needed.

One other way to generate 12-volt power is with an optional solar panel. With no moving parts, this device converts light into electricity. Depending on the level and intensity of light, a stream of current is sent to your camper battery to help offset usage. It's an excellent product that keeps producing supplemental electricity to help you stay power-ready indefinitely.

optional suspension equipment

Air Lift® Super Duty air springs ("air bags") are specially designed pneumatic chambers mounted above your truck's leaf or coil spring suspensions – which level your truck/camper rig by transferring the rear axle load forward, stabilizing your ride – and are adjustable with an optional in-cab control panel. And within Air Lift's Super Duty air springs are the Lance-exclusive internal jounce bumpers – eliminating bottom-out.

Roadmaster® anti-sway bars use the weight of your truck's axle as a brace against its chassis. As you turn, the pressure-shift to one side of the vehicle is countered by the bar – so, you stay level. In most cases, 12 bolts are all that's needed to install this solution that can dramatically improve overall handling – stabilize your rig in crosswinds – and virtually eliminate side-to-side rolling (especially during cornering).

SuperSprings® are self-adjusting suspension stabilizers mounted above your truck's leaf springs to enhance load-carrying capacity, handling and towing through a patented roller-shackle assembly. This means they work on an as-needed basis – automatically – with no rattle or noise. On most applications, SuperSprings can be used with or **SuperSprings®** without air bags.

SuperSprings® SuperSway-Stops™ compliment your existing air spring ("air bag") performance by further absorbing road shock impacts through micro-cellular polyurethane foam dampeners that deliver soft, progressive compression and spring-rates – all in a quick, simple, bolt-on installation.

Lance
FACTORY TRAINED
Service

dealer-installed
equipment

Installation of these support equipment systems by your Factory Authorized Lance Dealer is highly recommended to ensure you receive **The Ultimate Ride**. Experience a dramatic improvement in the drivability and handling of your truck and camper package – in any weather, on any road.

ASA's rear-view camera/monitor maximizes safety

2

When not towing loads that require an extended hitch, included in Reese's Tow Beast system is a reducer sleeve, which you use to reconnect the hitch ball and draw bar to the receiver hitch.

REESE
CERTIFIED

The 48-inch Reese Tow Beast hitch box extension ("tow bar") is constructed with a heavy steel tube inside another steel tube – welded together – to dramatically increase strength and towing capacity.

Within Air Lift's Super Duty air springs ("air bags") are the Lance-exclusive internal jounce bumpers

Happijac Qwik-Load™ turnbuckle upgrades make anchoring your camper a snap

4

Lance-exclusive cabover shocks ("cabover struts") have quick-release stainless steel connectors

- 1 Reese® Tow Beast™ Class V hitch/extension system increases your towing capabilities over your truck's factory-stock hitch.
- 2 ASA® wireless rear-view camera/microphone and in-cab monitor lets you see – and hear – what's behind you.
- 3 Happijac® frame-mount anchoring system and front-mounted centering guides assist with center alignment within the truck bed.
- 4 Happijac front and rear turnbuckles safely and securely attach and anchor the camper to your truck.
- 5 Air Lift® Super Duty™ air springs ("air bags") increase stability and levels the rig by transferring rear axle load forward.
- 6 Rancho® RS-9000X™ front and rear shocks greatly improve ride in all weather and road conditions.
- 7 Air Lift Air-On-Demand™ in-cab control controls the air compressor and pressure for the air springs ("air bags") and shocks.
- 8 Lance Custom Design™ cabover shocks ("cabover struts") reduce the impact of up-and-down motion from irregular roads.
- 9 Rear-mounted centering guides assist in positioning your camper within the truck bed, and are available for most truck models.

8

One of the many advantages of choosing a Lance truck camper as your RV is the ability to tow all your toys

When towing items behind larger Lance camper models, extending the hitch from the truck rearward to the camper bumper is necessary. (See chart at right for towing capacities of all models.)

The method Lance recommends involves a truck-mounted Class V receiver hitch and hitch box extension (as detailed in the 3-D view photos on the dealer-installed equipment section on the opposite page). A draw bar with hitch ball is inserted into the hitch box extension, the same way it would be inserted into the receiver hitch itself.

Reese manufactures the Tow Beast Class V receiver hitch and hitch box extension specifically for truck camper applications. It replaces standard truck factory-stock receivers to allow for a greater towing capacity over factory-stock hitch systems.

The other important benefit is that the Reese Tow Beast Class V system doesn't require you to attach the receiver hitch or hitch box extension to the camper. The hitch box extension can be in place when loading or unloading your camper. For very heavy loads, the hitch box extension in combination with a weight-equalizing hitch can be used. The chart at the lower right gives capacities for Reese's Tow Beast Class V hitch box extensions.

Always observe your truck's tow ratings – and the advice of your Factory Authorized Lance Dealer. Their service teams have the knowledge, experience and skill to outfit your rig correctly.

Tow capacities for Lance models requiring only a Reese Tow Beast™ Class V receiver hitch

	Weight carrying/ tongue weight	Weight distributing/ tongue weight
Lance 805 long bed	12,000 pounds/	14,000 pounds/
Lance 815 long bed	1200 pounds	1400 pounds
Lance 835		
Lance 805 short bed	6000 pounds/	8000 pounds/
	600 pounds	800 pounds

Tow capacities for Lance models requiring both a Reese Tow Beast™ Class V receiver hitch and hitch box extension

	Weight carrying/ tongue weight	Weight distributing/ tongue weight	Length of cut extension
Lance 815 short bed			24" * A universal heavy-duty 34" or 48" factory-stock Reese extension is cut down by a technical service professional to fit your particular application.
Lance 825 short bed			
Lance 830 short bed			
Lance 845 short bed			
Lance 861 short bed	6000 pounds/	8000 pounds/	
Lance 915	600 pounds	800 pounds	
Lance 971			
Lance 981			
Lance 992			
Lance 1040			
Lance 1055			41" *
Lance 1181	5000 pounds/	7500 pounds/	
Lance 1191	500 pounds	750 pounds	

*Dealer modifications required. Consult your Factory Authorized Lance Dealer for professional technical advice and proper equipment installation. All above weights, dimensions and capacities are approximate values – and subject to change without notice. All measurements are based on an 8.75-inch standard drop ball mount. Some capacities may vary depending on vehicle application. Be safe – always consult with your Factory Authorized Lance Dealer beforehand.

Own a truck? You're halfway to a great RV.

Why now – more than ever – a Lance truck camper makes sense as your RV-of-choice.

Versatility

A Lance camper and pickup truck combination is like owning four different vehicles in one.

A comfortable motorhome. A powerful tow vehicle. An all-season, all-terrain RV. A second car around town. And only a Lance camper allows you to select so many options to suit your individual needs. Your Lance can be as versatile as you need it to be.

Flexibility

Tow any of your toys. Boat, horse trailer, motorcycles, cargo trailer, snowmobiles, ATVs. Whatever.

At camp, uncouple your toy trailer – unload your camper with pushbutton ease – and you're free to take your truck and travel. And because your Lance is fully self-contained, there's no need for hookups – so you can travel and camp places other RVs dare not go.

Handling

No other RV maneuvers like a Lance camper – especially with a four-wheel-drive truck. On or off the road,

a Lance handles like a single, integrated unit with your truck – and there's no need to get used to a new vehicle. Turns are tighter. No trouble backing-up. Parking is simple. Driving up or down grades is easier. And snow, sand and streams are less of a problem. You can really get away from it all in a Lance.

Affordable

Own a truck? You're already halfway to a great RV. With a purchase price far less than a motorhome, a Lance

actually costs less to own and operate, too. No registration. Minimal insurance. No storage costs if stored at home. Better fuel economy. The lowest-cost maintenance of any RV. A well-engineered, well-built, high-quality product that keeps its resale value better than any other RV on the road.
